

## **IP6: Mentoring Assignment**

On this mentoring Open House day, we had to mentor upcoming students.

This was held in an online format. We presented a presentation about the Didactic Internship program. All the interns collaborated in organizing and hosting the Internship Open House.

Participants:

- Prospective students
- Current students enrolled in DPD
- Dr.Schnoll & Susan Jakuboski

During the presentation, we talked about all the required coursework completed before starting the internship, how to combine it with the coursework of the MS program, grade requirements, submission of documents, filling forms, how to get matched into the didactic program, and the other didactic internship program requirements as well. We had to talk about our own experiences, we talked about what academic materials should be reviewed before starting the internship. In addition, we provided our impressions, challenges, and realistic concerns.

I think this collaboration and hosting with interns gave a clear expected picture of internships for incoming students. I hope our hosting the open house about dietetic internship was helpful and will positively impact prospective students. In my opinion, the intern's clear feedback about ongoing internships will result in good outcomes in upcoming student's performance.

I wish them prosperity academically and professionally.
